

OUR

COMPANY PROFILE

TIANCHENG FIRE PROTECTION EQUIPMENT CO., LTD (HEREINAFTER REFERRED AS TO TC) SPECIALIZES IN DESIGN AND MANUFACTURE OF HIGH QUALITY FIRE PROTECTION SOLUTIONS FOR COMMERCIAL, INDUSTRIAL AND DOMESTIC APPLICATIONS. WE HAVE NEARLY 30 YEARS EXPERIENCE IN THE FIELD OF FIRE PROTECTION INDUSTRY.

EVERLASTING DESIRE FOR INNOVATION DRIVES OUR COMPANY'S PRODUCT DEVELOPMENT PROGRESS. WE ARE CONTINUOUSLY EXPLORING NEW TECHNOLOGIES THAT HELP US LIVE IN A SMART WORLD. SMART TC MAKES A MORE CONNECTED AND CARING PLACE, WHERE RESOURCES ARE VALUED, WHERE IMPACT OF THE WOLD IS CONSIDERED, WHERE SUSTAINABLE ENERGY IS DELIVERED RELIABLY AND EFFICIENTLY.

TC ADOPTS ADVANCED TECHNOLOGIES: IOT, BIG DATA, CLOUD COMPUTING TO LAUNCH ITS SMART TC SERIES INCLUDING "SMART FIRE PROTECTION" , "SMART HOME SAFETY" WITH DIFFERENT APPS AVAILABLE. TC IS CERTIFIED BY ISO9001, ISO14001 AND ISO18001. OUR PRODUCTS ARE CERTIFIED BY CCCF, LPCB, CE AND GOST. OUR CORPORATE PHILOSOPHY IS BASED ON HIGH QUALITY, HIGH EFFICIENT SERVICE AND REASONABLE PRICES. TC IS THE FIRST AND ONLY IN CHINA THAT HOLDS A PRODUCT LIFETIME WARRANTY. TC HAS REACHED A LEADING POSITION IN THE MARKET FOR PROFESSIONAL FIRE PROTECTION, WITH 32 DOMESTIC BRANCHES IN MAJOR CITIES, SUCH AS BEIJING, SHANGHAI, CHENGDU, GUANGZHOU, SHENZHEN, NANJING, ETC.,AND 4 BRANCHES OVERSEAS IN NOIDA INDIA, DUBAI UAE, HO CHI MINH CITY VIETNAM, MOSCOW RUSSIA, BESIDES A NETWORK OF PARTNERS AND DISTRIBUTORS. COMBINING TC'S BRAND, CAPITAL, TECHNOLOGY AND MANAGEMENT ADVANTAGES IN DOMESTIC AND INTERNATIONAL MARKETS, TC IS COMMITTED TO PROVIDING CUSTOMERS WITH COMPREHENSIVE AND EFFICIENT ONE-STOP FIRE PROTECTION SOLUTIONS, IMPROVING THE OVERALL QUALITY OF LIFE AND DRIVING THE DEVELOPMENT OF MODERN CITIES.

ABOUT US

✨JB-TB-TC5109
 Intelligent Fire Alarm Control Panel
 ✨ EN54-2 CERTIFIED
 EN54-4 CERTIFIED

FEATURE

- Intelligent bus control mode; max 255 addressable points per loop, max 4 loops, max 48 zones
- Loop card type design: 1-4 loop cards can be selected
- Glass fuse per loop
- Black box function
- Self-design loop protocol
- Wall-mounted structure, compact and exquisite
- Akzo outer coating; anti-corrosion
- Language: simplified Chinese, English, Turkish and Russian(cus to mized)
- Self-design loop protocol

TECHNICAL SPECIFICATIONS

 Operating environment
 Communication interface

AC230V(50HZ), Voltage range: +10%~-15%
 1A
 Fire output, Fault output, 24V power output, Loop output
 1020/4 loops addressable points
 7-inch color LCD screen
 12V/12AH sealed lead acid battery*2
 420mm x 140mm x 560mm
 Temperature: -5°C~+50°C; Relative Humidity: ≤95% non-condensing
 RS485, CAN, USB

DETAILS

- The control panel is mounted on the wall through 4 mounting holes, the dimensions of the mounting holes are shown in the picture. The right side of the control panel has 8 wiring holes, which are easy for wiring between the control panel and field devices. There are also 5 knock holes at the top, if the holes on the right side are not enough.

JTY-GM-TC5161
 Addressable Photoelectric Smoke Detector
 EN54-7 CERTIFIED

FEATURE

- Infrared scattering principle
- Non-polarized two-wire
- Drift compensation and fault detecting function

 Electronically coding
 100mm x 51mm (with base)
 60mm
 Temperature: $-10^{\circ}\text{C} \sim +55^{\circ}\text{C}$. Relative Humidity: $\leq 95\%$ non-condensing
 IP23
 ABS: Milky white
 1000m

DETAILS

1. Base of the detector is shown below. There are 2 conductor pieces with terminals on the base. Detector's loop should be respectively connected with two terminals (non-polarized). After the base is fixed firmly, rotate the bottom of detector and base clockwise, and then the detector will be fitted to the base.
2. 1.0mm² or above fire cable, subject to local codes.

* JTW-ZOM-TC5162

Addressable Rate of Rise
Fixed Temperature Heat Detector

* EN54-5 CERTIFIED

FEATURE

- Advanced single-chip microcomputer technology
- Non-polarized two-wire
- Thermal sensitive element improves the response speed of temperature variation

TECHNICAL SPECIFICATIONS

Operating Voltage	Loop 24V(18.5V~26V)
Operating Current	Standby current: $\leq 0.3\text{mA}$; Alarm current: $\leq 0.8\text{mA}$
Weight	About 110g
Code range	1~255
Coding method	Electronically coding
Dimension	100mm x 51mm (with base)
Mounting hole distance	60mm
Operating environment	Temperature: $-10^{\circ}\text{C} \sim +55^{\circ}\text{C}$. Relative Humidity: $\leq 95\%$ non-condensing
Ingress protection rating	IP33
Material and color of enclosure	ABS: Milky white
Maximum transmission distance	1000m

DETAILS

- Fix the base with two tapping screws, and then connect loop to terminals (polarity-insensitive). After the base is fixed firmly, rotate the bottom of detector and base clockwise, and then the detector will be fitted to the base.
- Wiring instructions: RVS twisted pair with cross-sectional area $\geq 1.0\text{mm}^2$ should be selected for the second bus of the detector, which should be laid through metal pipe or flame retardant pipe. The length of the connecting wire should be limited to the single bus resistance $\leq 20\Omega$, otherwise the wire diameter should be increased.

TCMK5260

Addressable Loop Isolator

EN54-17 CERTIFIED

FEATURE

- Polarized connection with peripheral devices and no need to transfer connection of input and output.
- Delayed power supply to output terminal devices will avoid over load or strong transient current
- Plug-in structure
- Non-polarized two-wire

60mm

86mm x 41mm x 86mm(with base)

IP30

147g(with base)

DETAILS

- Take surface installation for the isolator, install the base upward of the arrow direction, plug-in for the isolator to the base. Pull off the isolator, wear the cable through wiring hole on the base and connect correspondent terminal and plug in the isolator. Mounting hole distance is 60mm.

Wiring instruction:

BS(pin 5),AS(pin 8):loop negative; BP(pin 6),AP(pin 7):loop positive

The positive cable inserts from pin 7 and out from pin 6. The cable negative inserts from pin 8 and out from pin 5. Please refer to control panel TC5109 terminal mark wiring. 5.6 Recommended Cabling:1.0mm² or above fire cable, subject to local codes.

TCMK5263  
 Addressable Single I/O Module
 EN54-18 CERTIFIED

FEATURE

- Line detection function for input and output
- Input terminal is set as normal open detecting function connected with passive contact
- Non-polarized two-wire
- Active and passive output

TECHNICAL SPECIFICATIONS

Operating Voltage	Loop:24V(18.5V~26V); Power:DC24V(DC19V~DC28V)
Standby current	Loop:<0.2mA; Power: <2mA
Starting current	Loop:<2mA;Power:<22mA
Operating Environment	Temperature:-10°C~+55°C; Relative Humidity:<95% non-condensing
Output capacity	Passive:Capacity:DC30V/3A;Contact resistance in normal condition:100kΩ; Closed when activated;Suitable for DC or AC 12V~48V;Active output: DC24V/1.5A
Coding method	Electronically coding
Code range	1~255
Material and color of enclosure	ABS; Porcelain white
Weight	About 147g(with base)
Mounting hole distance	60mm
Dimension(L×W×H)	86mm×38mm×86mm(with base)

DETAILS

Feedback input terminal has disconnection detection function, add a 10K terminal resistance at one end, otherwise it will report as product feedback terminal fault. Output line has disconnection and short line detection function, when module does no action, voltage between DC13V to 48V is required at normal open output terminal otherwise it will report as module output line fault.

Open installation applied for the module. Insert mode for installation between base and module. When installing, pull down the module, lead the wire through wiring hole, connect it with terminal and push the module onto the base. The mounting hole distance is 60mm.

J-SAP-TCSB5264
 Analogue Addressable Manual Call Point

FEATURE

- Plug-in structure .Simple and convenient installation
- Alarm by pressing, reset by a special key
- Non-polarized two-wire to the control panel
- Reusable

About 120g(with base)
60mm
95mm x 44mm x 95mm(with base)

DETAILS

1. The MCP is mounted inside the wall. Unplug the point, put cables into the base' s entrance hole and connect corresponding terminals.
2. Wiring instructions: BS,AS and BP,AP: two bus inputs of non-polarized signals.

✨ **TCSG5266**
 Addressable Sounder Strobe
 ✨ EN-54-3 CERTIFIED

FEATURE

- Four wires: non-polarized signal two-wire, and non-polarized DC24V power two-wire
- Built-in microprocessor
- Self-diagnostic function
- Electronically coding

TECHNICAL SPECIFICATIONS

Operating voltage	Loop: 24V (18.5V~26V); Power: DC24V (DC19V~DC28V)
Standby current	Loop: ≤0.2mA; Power: ≤0.5mA
Active current	Loop: ≤1.5mA; Power: ≤50mA
Operating Environment	Indoor (Non-residential); Temperature: -10°C~+50°C
Sound level	Relative Humidity: ≤95% (40±2°C)
Pitch shift periodic	90dB~115dB (A weighted)
Basic flashing frequency	3.5S~4.5S
Weight	1Hz~2Hz
Dimension (L×W×H)	200g
	140mm×55.3mm×115mm (with base)

DETAILS

1. Unplug the base.
2. Fix the base. Thread cable through entrance hole from the back of base; according to the words and directions of arrow around the entrance hole, fix the base.
3. The sounder strobe is mounted inside the wall. The base box and cover of the sounder strobe are plugged together, surfaced mounted on 86H50 embedded box. The mounting hole distance is 60mm.

1~255
ABS; Porcelain white
About 110g(with base)
60mm
60mm
86mm x 38mm x 86mm (with base)

FEATURE

- Designed to connect with active devices in field such as water flow indicator, pressure switch, position switch, signal valve and devices able to transmit back switch signals
- The built-in microprocessor processes messages intelligently
- Plug-in structure
- Non-polarized two-wire

DETAILS

The module and base adopts plug-in structure. Unplug the module, put cables into the entrance hole and connect corresponding terminals. And then plug the module onto the base.

L1 (7), L2 (8): Non-polarized signal bus input terminal.

AS1 (9), AS2 (10): passive input, connect passive normally open contact (alarms when device's action closes);

It can also be set to normally closed input by using hand-held Encoder.

Signal bus L1 and L2 adopt RVS twisted pair, and cross section $\geq 1.0\text{mm}^2$; AS1 and AS2 adopt RV wire,

✦ **JTF-GOM-TC5163**

Addressable Heat&Smoke Combined Detector

✦ EN54-5 CERTIFIED
✦ EN54-7 CERTIFIED

FEATURE

- “ Supervising external circuits function for input and-output
- single chip processes data in real time
- drift compensation and dust accumulation and report pollution self-diagnosis function
- non-polarized two wire bus signal

TECHNICAL SPECIFICATIONS

Operating Voltage	loop 24V(16~28V)
Operating Current	Monitoring current: ≤ 0.3mA ;Alarm current: ≤ 0.9mA
Weight	About 110g
Protected area	20~30 m ²
Operating environment	Temperature: -10°C~+55°C; relative humidity: < 95%, non-condensing
Dimension	100mm x 51mm
Mounting hole distance	60mm
Ingress protection rating	IP23
Material and color	ABS;Milky white
Maximum transmission range	1500m

DETAILS

1. There are 2 conductor pieces with terminals on the base.
Loop of the detector should be connected with two terminals (polarity-insensitive).
After the base is fixed firmly, rotate the bottom of detector and base clockwise, and then the detector will be fitted to the base
2. 1.0mm² or above RVS twisted pair, laid out through metal conduit or flame-resistant conduit.

TCMK5269

 Addressable Dual Input Module

 EN54-18 CERTIFIED

FEATURE

- the module has two input terminals, namely input 1 and input 2, which correspond to two addresses respectively
- input loop has the function of supervising the external loop and fault information will be reported when circuit breaks.
- the microprocessor is adopted to realize signal processing, and the digital signal is used to communicate with the control panel, which works stably and reliably and has a good ability to suppress electromagnetic interference.

TECHNICAL SPECIFICATIONS

Rated operating voltage

DC24V(18.5V~26V)

Operating current

Monitoring current: $\leq 0.25\text{mA}$; Single alarm current: $\leq 1.3\text{mA}$;

Operating Environment

Dual alarm current: $\leq 2.4\text{mA}$

Wiring

Temperature: $-10^{\circ}\text{C} \sim +55^{\circ}\text{C}$; Relative Humidity: $\leq 95\%$ non-condensing

Material and color

Connected with non-polarized bus two wire of the fire alarm control panel

Input method

ABS; Porcelain white

Weight

Open circuit occurs when normally open terminal supervising external loop (short circuit is an action signal)

Mounting hole distance

110g

Dimension(L x W x H)

60mm

86mm x 86mm x 38mm (with base)

DETAILS

- the module has two input terminals, namely input 1 and input 2, which correspond to two addresses respectively
- input loop has the function of supervising the external loop and fault information will be reported when circuit breaks.
- the microprocessor is adopted to realize signal processing, and the digital signal is used to communicate with the control panel, which works stably and reliably and has a good ability to suppress electromagnetic interference.

✿ TCMK5265  
 Addressable I/O Module
 ✿ EN54-18 CERTIFIED

FEATURE

- non-polarized two bus, ultra-low power consumption, no need to add DC24V power supply
- passive output w/ input and output have isolating loop to effectively filter out external interference

TECHNICAL SPECIFICATIONS

Rated operating voltage	DC 24V (14V~28V)
Operating current	Monitoring current: $\leq 0.2\text{mA}$ start current: $\leq 0.5\text{mA}$
Operating Environment	Temperature: $-10^{\circ}\text{C} \sim +55^{\circ}\text{C}$; relative humidity: $\leq 95\%$, non-condensing
Input supervisory external loop	Open circuit occurs when normally open terminal supervising external loop (short circuit is an action signal), the module will send a fault signal to the control panel.
Material and color	ABS; Porcelain white
Output supervisory external loop	Short circuit or open circuit on the output loop occurs, the module will send a fault signal to the control panel
Weight	147g
Mounting hole distance	60mm
Dimension (L x W x H)	86mm x 86mm x 38mm (with base)

DETAILS

1. Fix the base with two tapping screws, and then connect loop to terminals (polarity-insensitive). After the base is fixed firmly, rotate the bottom of detector and base clockwise, and then the detector will be fitted to the base.
2. Wiring instructions: RVS twisted pair with cross-sectional area $\geq 1.0\text{mm}^2$ should be selected for the second bus of the detector, which should be laid through metal pipe or flame retardant pipe. The length of the connecting wire should be limited to the single bus resistance $\leq 20\Omega$, otherwise the wire diameter should be increased.

✱ **TCSG 5270**
 Sounder Strobe (loop powered)
 ✱ EN54-3 CERTIFIED

FEATURE

- wiring: non-polarized two signal bus
- built-in microprocessor, intelligent judgement ability
- self-diagnose function, ensuring its reliable work
- multilevel filtering of software and hardware can effectively suppress interference signals

TECHNICAL SPECIFICATIONS

Signal bus voltage	Bus 24V (17V~28V)
Operating current	Monitoring current: ≤ 0.2mA; Bus start alarm current: ≤ 4mA
Operating Environment	Temperature: -10°C~+55°C; Relative Humidity: ≤ 95% non-condensing
Main sound frequency	1.67KHZ~5.9KHZ
Pitch shift periodic	3.5s~4.5s
Ingress protection rating	IP21C
Material and color	ABS, milky white
Weight	110g
Mounting hole distance	60mm
Dimension(L x W x H)	140mm*115mm*55mm

✱ **TCZS 5273**
 Remote Indicator

FEATURE

- share the address with the associating devices
- the microprocessor is adopted to realize signal processing, and the digital signal is used to communicate with the control panel, which works stably and reliably, and has a good ability to suppress electromagnetic interference.
- electronically coding.

TECHNICAL SPECIFICATIONS

Rated operating voltage	DC 24V
Operating current	Monitoring current: ≤ 0.21mA; Bus start alarm current: ≤ 0.4mA
Operating Environment	Indoor Atmospheric pressure: 86kPa~106kPa Temperature: -10°C~+55°C; relative humidity: ≤ 95%, non-condensing
Material and color	ABS, milky white
Weight	110g
